Numbering systems

Numbering systems are used in printing machines for successive numbering of various printed materials – lottery tickets, some accounting documents, i.e. invoices, delivery and acceptance notes, etc., in which individual numbering of each printed matter and precise records are required. The equipment are produced with a highest accuracy and with a preferential care.

The numbering wheels are made from special tool steel and they are hardened. The structure is in full conformity with a purpose of the numbering machine and its practical use.

1. Numbering box for flat printing (setting), with automatic feed

The numbering boxes are delivered in types specified in the enclosed price list. The push-button of the numbering equipment is marked with *, No, another symbol or the push-button is without a mark.

2. Numbering box for rotary printing, with automatic feed.

They are delivered as transversal and also lengthwise numbering boxes. Two of produced types are in the enclosed price list.

3. Numbering box for flat print (typesetting), with central feed control

These numbering boxes can be placed side by side on one wheel. The feed of the numbering boxes /tools is provided by a central push-button. The push-button is without a mark.

4. Special numbering boxes for flat and rotary print without automatic feed

These are used for dating at packing machines, carton labelling/marketing, stamp of small series, etc.

5. Numbering stamps for stamp of plastic, paperwork, small boxes, etc.

These numbering stamp are substantially the same in type of the numbering equipment stated above. They have a sharp number outline that enables to stamp the mentioned material. They are used for example for stamps of medicine small boxes, bottles, packings, etc.

6. Service of numbering equipment including guarantee and post-guarantee service

We provide guarantee and post-guarantee service for our numbering machines, their cleaning and repairs. In addition we service and repair numbering machines of other foreign producers, including production of selected spare parts for numbering machines from abroad.

The numbering machines produced and delivered by TOPOZ have a standard letter high of 4 mm and it is possible to change it according to the clients requirements.. As a standard, letter Antiqua and Grotesk are used. Based on customers' wishes the number type can be changed for another one, or to use engravings according to handed over samples.
