Dating sticks and markings

Dating sticks and markings are intended for instalment in marking, printing and packing machines. They are produced based on customer's data (e.g. a detailed technical drawing) in dimensions, shapes and font types estimated by the customer in advance.

Markings are delivered as individual letters, numbers and mark or as a whole file of marks (e.g. word, combination of marks and numbers).

Brass, aluminium, steel or hardened steel, eventually cemented steel are used for production of these markings.

Samples of other markings

MADE IN CZECH REPUBLIC, EU
