

Manual book-binding press **KL 1; KL 2; KL 3**

This book-binding press is used for pressing of the book, drying of the graphic artworks etc. The press is made from steel; accurate movement of the upper plate is ensured by sliding sleeves.

The distance and power of the pressure is manually adjusted by turning of the screw bar with the handle.

All models have a robust construction for professional job with a long live reliability in office and bookbinding shops.

The book-binding press can be produced also in different dimensions .

The table with the shelve under the machine can be ordered as an option.
