

Manual Pallet Turner/Inverter

MOP 540; MOP 720

Manual pallet turner/inverter serves in paper and printing plants for turning of paper sheet layers on pallets, where it is necessary to turn them in processing.

This can be done by one worker with a help of this manual pallet turner.

The equipment goes under the longer site of pallet and on the paper layer another pallet is laid down. The upper sliding part will be pressed by a fork to the pallet and blocked against paper layer shifting and releasing. Then the operator tilts the pallet turner into the horizontal position and shifts the sliding forks with a paper layer with pallets to the other end of track and puts them again to the vertical position. The pile turner will be blocked against skidding by shifting an adjusting leg.

Then the material will be transported by a lift truck for a further proceeding.

Procedure of material stack turning:

Technische Angaben:

	MOP 540	MOP 720
Dimensions: (width x depth x height) mm	720 x 570 x 1540	810 x 620 x 1810
Loading capacity:	540 kg	720 kg
