

Double loop wire closing machine **PRESS 720**

This closing machine is a perfect machine for start up in production of books, manuals, calendars etc., that are bound with a double loop wire, with or without calendar hangers.

All diameters of the wire ranging from 3/16" up to 1 1/4" can be used, no matter of the pitch. It is a very robust model with welded construction for professional job both in office and bookbinding shops.

The cut double loop wire „TWIN WIRE“, which should be cut by hand or by a special machine, is to be placed manually into the prepunched book or calendar (with hanger if needed) and inserted into the machine.

Pressing a foot pedal activates the pneumatic piston which pushes the upper pressure plate and by this the wire is closed. Both hands are thus free for preparation of another book for binding.

Technical data:

model	720
working width:	720 mm
diameter of binding:	3/16 - 1 1/4"
all pitches:	4:1, 3:1 and 2:1
air consumption:	60 l/min. having max. 6 bar
width:	730 mm
depth:	240 mm
height:	420 mm
weight:	43 kg
mechanical speed:	40 pcs/min

The table under the machine is not supplied as standard feature of the machine and if ordered then it will be charged extra.
