

## Screen - printing frames

Based on orders we produce steel or aluminium screen-printing frames in dimensions required by the customer. Frame rigidity and their flatness is ensured in optimal dimensioned material profile and precise welds in corners along the whole circuit contact. The welds are grounded in plane and checked to be compact.

The surface of steel frames is provided with powder colour. On request stated in the order, the surface of aluminium frames estimated for sticking of the screen can be slightly roughened. In case of greater frame dimensions (up to printing size A2) the aluminium profile are better for easy handling.

### Recommended frame dimensions:

Printing size	Printing surface (mm)	External frame size (mm)	Aluminium frame profile (mm/mm)
<b>A4</b>	210 x 297	570 x 660	30 x 30/2
<b>A3</b>	297 x 420	680 x 800	40 x 40/3
<b>A2</b>	420 x 594	800 x 970	40 x 40/4
<b>A1</b>	594 x 840	1030 x 1280	40 x 60/3
<b>A0</b>	840 x 1188	1320 x 1660	40 x 60/4

The steel or aluminium frames in different size can be produced based on requirements.
