

PERFORATIONSMUSTERKARTE

Für Perforier- und Biegevorrichtung herstellen wir Käbme, siehe die folgende Tabelle. Es werden 6 Typen der Biegeleisten geliefert, die für Biegung der Materialien in der Stärke von 0,4 mm bis 1,6 mm benützt werden, eventuell liefern wir auch Ordnerleiste oder doppelte Leiste. Außerdem werden Reparaturen und Schärpen dieser Käbme durchgeführt. Die Biegeleisten werden nicht repariert.
